

Hegrecad BLACK

General Description

Hegrecad BLACK is a concentrated black paste;

The product as supplied is a mixture substance;

The product is used industrially as a coloring in polyether polyurethane foams.

Applications

Coloring of polyurethane systems for example:

Polyether base flexible slab foams

Polyether base integral skin foams

Polyether base rigid foams.

Polyester base shoe sole foams.

Typical Physical Properties

Supply form	Viscous Paste
Fineness	<20 μ m
Viscosity(25 $^{\circ}$ C)	8000-12000 cp.s
Solid Content(%)	30-50%
Hiding Power(g/m ³)	\leq 1-80
Constructability	No Effect on Constructing
Recoatibility	No Effect on Recoating
Skin Resistance(48h)	Antiskinning
Hardness & Double pendulum	\geq 0.2
Drying time (Inner side)	\leq 3
Drying time(outside)	\leq 24

Storage and package Information

HeJia Chemical recommends that our catalysts be stored in a dry and cool area under appropriate ventilation conditions. Each container should be closed tightly to avoid contamination with moisture or other negative influences, which could change the products' performance in the end use. Lower and higher storage temperatures are not preferable and should be avoided. .

35kgs per drum.
